

## SCREEN RESEARCH AT THE IFA – BERLIN

*Photograph from TwoLine UK.*

**IFA 2005 - Screen Research  
XMask at Harman booth.**

Integrated into a frame of unequalled compactness and elegance, the XMask is the ultimate projection screen. Its innovative motorized masks frame your image with the black border it deserves, no matter what its format, and significantly improve the contrast and perceived image quality.

The XMask is also available as a curved screen now known as the TheaterCurve.

We will be waiting for your visit at Harman Consumer Group International (Hall 18/101) or at the Motor Presse Booth (Hall 16).

Please contact us to make an appointment by return.
