RUNNERS-UP

ClearPix are the first screens that allow speakers to be placed directly behind the screen, with no loss of audio or video quality. The only acoustically transparent screens to be fully compatible with fixed pixel projectors such as DLP,

LCD, DMD and D-ILA, they come in widths from 1.80m to over 3m, with retail prices ranging from £1,900 to £3,300. Electric screens come in the same sizes, with prices from £2,600 to £4,300. A fabulous innovation. ■
