

PRESS RELEASE

Screen Research Appoints Mike Barber as Director of Business Development

Screen Research relocates its North American facilities to Hiram, Georgia.

Nantes, France – June 17, 2009 – Screen Research, a world-class provider of innovative projector screen solutions for the custom home theater and professional markets, welcomes Mike Barber to the executive team as director of business development.

Barber is tasked with growing the screen manufacturer's presence within the North American market, working closely with its nationwide sales representatives to facilitate world-class service between the headquarters in France and its broad dealer-base of US consumer electronics integrators. An industry veteran in his own right, Mike Barber joins Screen Research after seven years serving as national director of sales for Meridian America. He brings incredible passion and more than 12 years of industry sales and management experience to Screen Research.

Barber will spearhead Screen Research's North American operations from the company's newly relocated offices in Hiram, Georgia. Screen Research's Georgia facilities will house sales, marketing, and technical support to ensure that every screen specified by Screen Research dealers is fully supported from pre-sales through to installation.

"We welcome Mike to the team, and are pleased to have someone with his video, audio and systems integration sales experience to head up our North American office," says Yves Trélohan, Screen Research CEO and founder. "We are confident that the new location in Georgia will allow us to manage the time difference between Europe and the USA more effectively, as well as provide our world-class service across our North American dealer network."
