

SolidPix™ 2 White 0.9

The new SolidPix™ 2 White 0.9 screen material is the result of redesigning its predecessor to further enhance perfect color balance and off-axis gain, achieving an improved level of visual performance for dedicated home-theatre applications. It is completely hot spot free and ensures reference video accuracy for the whole audience, regardless of their positioning angle in relation to the screen.

This surface is ideal to be used with all types of projectors, particularly with the increased demand of ultra high definition materials. Suitable to be used with all fixed and motorized screen models.

Features

- > Reference performance matte white solid screen material
- > Compatible with controlled ambient light conditions
- > Near unity gain screen material with perfect color balance and white field uniformity
- > No hot spots or loss of gain angle at the edges of the screen
- > Future-proof for extremely high resolution applications
- > Resistant front surface
- > ISF® and PVA certified

*Please check available screens for this projection surface on our pricelist.

Sample

Specifications

Material Type	Flexible Front Projection
True Gain	0.9
Viewing Angle	180°
Minimum Recommended Width for 4K	Any
Minimum Throw Distance	UST
ALR Ambient Light Rejecting	3/10
Lay Flat Quality	Excellent
Flame Resistance	Yes

Reference Color Accuracy

At Screen Research we are very dedicated to achieve a flat spectral response with our screens. Our screen materials are designed to be easily calibrated to D65. Particular attention is dedicated to achieve a flat spectral response off-axis and to avoid even the smallest color-shifts, not only on-axis, but throughout the whole recommended viewing angle.
