Projector Vertical Wal Mount

PVVMSM-50

PVVMSM-50

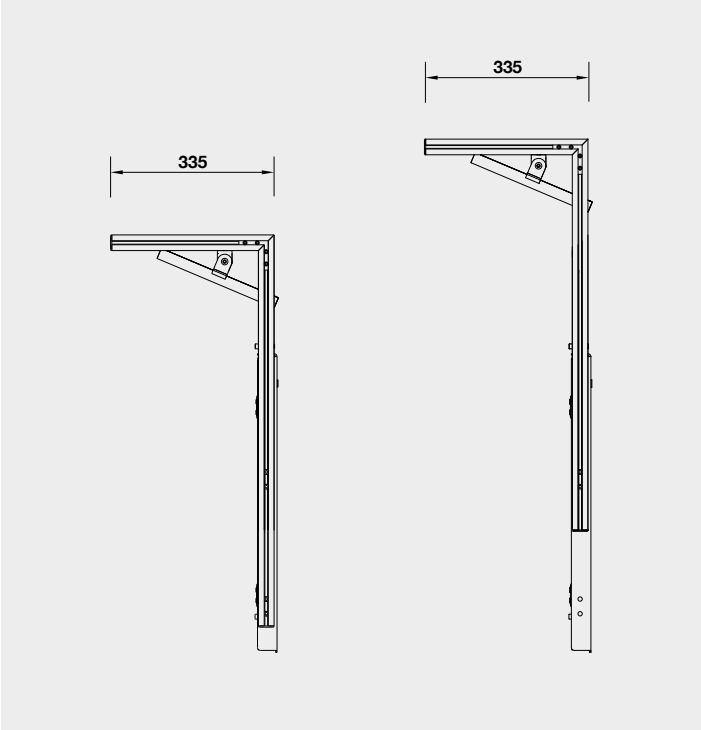
Projector Vertical Mounting Support

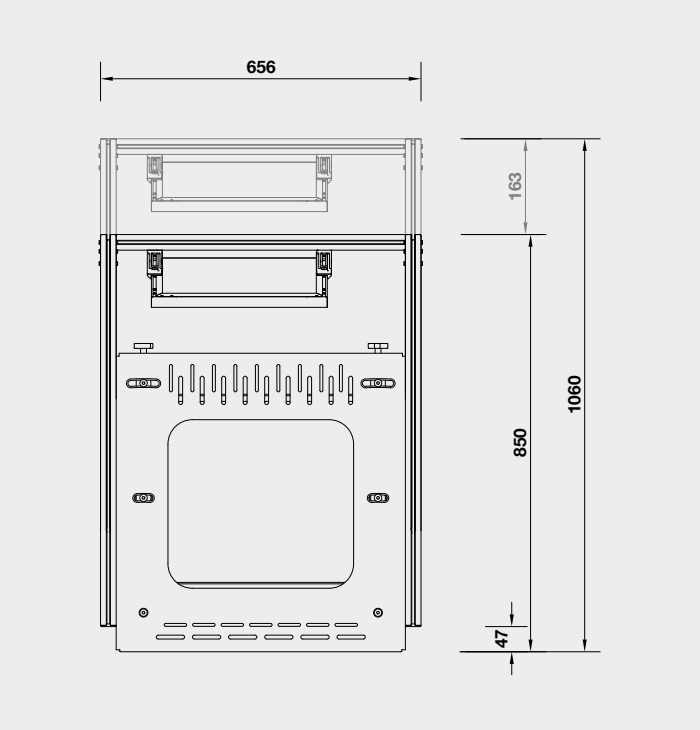
This system is designed for vertical wall installation of the projector, providing a clean and space-saving solution.
The projector is positioned approximately 4 cm from the wall, ensuring a compact and discreet setup.
The structure is ideal for installations where ceiling mounting is not possible or not desired.

It is especially suitable for wall recesses, allowing the projector to be hidden from view.
The design maintains image stability while optimizing space usage.
Ideal for professional installations and custom home cinema projects.

Specifications

- Dimensions: 850/1060 × 656 mm
- Total depth: 335 mm
- Universal mount – maximum projector weight: 50 kg
- Maximum projector mounting size (screw spacing): 480 x 450 mm (length x width)
- Mirror size: 315 x 215 x 22,5 mm (with frame 360 x 260)
- Screw size: M6 / M8
- Bracket weight: 15 kg
- Color: Black





The mount consists of two separate components: one fixed to the wall and one attached to the projector.

It allows adjustable rotation up to 6°, controlled by upper locking knobs for precise alignment.
The system includes a FIRST SURFACE MIRROR with 96% reflectance, ensuring no ghosting or double images.

The mirror can be tilted, moved closer or farther, and raised or lowered as required.

This flexibility allows accurate image positioning in complex installations.
The result is a precise, discreet, and highly adaptable projection system.
